

5 TOP TIPS TO MAKE HYBRID WORK FOR YOU

Adjusting to the “New Normal”

Was it a dream? Trust us, it did actually happen. Now though, things are starting to get back to “normal”. What that is though is anyone’s guess, but one thing’s certain, Hybrid Working is here to stay.

Hybrid Working can offer many advantages. Many companies have reported increased productivity, lower costs and an uplift in employee happiness.

Everyone would also agree that the new way of working relies heavily on technology. That’s where we come in. We can provide the vital comms tools you need and support you so you can adjust, and maximise the potential of the new way of working.

contact that works wonders

5 Top tips for hybrid working

1 Communication

It's the big one. It's all about communication. It connects people to work together. Everything good that happens in the "normal" workplace starts with great communication. Teams collaborate on projects and everyone is kept in the loop about what's going on both in and out of work.

2 Variety is the spice of life

Free up your teams to communicate their way. During the pandemic many people have become tired of being locked into video calling, and are looking for more flexible ways of communicating. From Teams to Slack, you can communicate and collaborate the way that suits you best.

3 Meetings

Meetings are different online and to make them work, they need to be as close to face-to-face as possible. You may be using the app you've always used. There's plenty of options, so choose the one that works perfectly for you now. It's also important that everyone knows how to use it!

4 Wellbeing

Make everyone feel empowered, always part of a team and never alone. Make sure that everyone has the tech and tools they need to communicate seamlessly. Catch-up, meet, chat, talk and collaborate as much as you need to feel connected, not isolated.

5 Get social

People miss the social side of work life. Make sure to take time to chat about non-work stuff. Just relax and shoot the breeze like you used to. Try and answer the crucial questions of the day like: what box set are you watching on Netflix at the minute?

5 Ways we can help

1 Cloud

Enreach's cloud solutions have all the features you need to make sure everyone stays seamlessly connected wherever they are. It allows your teams total flexibility in the way they work.

2 Broadband

We've got the broadband to keep connected at a price that's right for you. Whether you're searching for superfast fibre or a basic business broadband connection, we've got the speeds you need.

3 HD Touch

The flexibility of a mobile, the power of a feature packed phone system. It's the game-changing smartphone for business. Combining a HD touchscreen and features normally found on your smartphone, the HD Touch is the ideal partner for flexible working.

4 Mobile

Keep your teams talking and in touch wherever they are. We're not tied to any network, so you can make your budget work harder and find a deal that's the perfect fit. Our packages are the unbeatable combo of the strength of our partner networks and amazing customer service.

5 Award-winning support

Making sure you've got all the right comms in place to fit exactly with the way you work now can be daunting and time consuming. We're here to help you all the way whichever way your hybrid journey takes you. However, wherever your teams work we can help make them feel right at home.

We can help your business make hybrid work for you.
